

PowerCaps

Flu symptoms and Body aches
Headache and facial Pain
Nasal Discharge and Sinus Congestion

Composition:

Each capsule contains:

Ibuprofen 300 mg.
Pseudoephedrine HCl 45 mg.

Properties:

- * PowerCaps is a medicine containing active ingredients which kill pain (analgesic), reduce swelling (anti-inflammatory), reduce temperature (antipyretic) and ease nasal congestion (decongestant).
- * Ibuprofen is a well known analgesic, anti-inflammatory and antipyretic agent. It is very effective in relieving headache, body aches and pains. Its antipyretic activity is effective in reducing fever. Pseudoephedrine Hydrochloride reduces swelling in the passages of the nose (nasal decongestant) and so relieves a blocked or runny nose. Also helps to decongest sinus openings and passages and relieves sinus pressure accompanied with sinusitis.
- * PowerCaps are capsules containing a combination of active ingredients which are effective in reducing different symptoms of heavy colds, flu and sinusitis. Cold symptoms include a runny or blocked nose, sneezing and possibly a headache or sore throat, Flu symptoms include more severe headaches, aches and pains, fever and tiredness, usually needing a day or two in bed. Sinusitis symptoms include frontal headache, facial pain and tenderness, usually with nasal discharge.

Indications:

- * Common cold & flu.
- * Nasal Congestion.
- * Sinus congestion and pains.
- * Headache and muscular pains.
- * Analgesic, anti-inflammatory and antipyretic.
- * For the relief of symptoms associated with:
 - Upper respiratory tract congestion.
 - Respiratory tract allergies.
 - Common cold.

Dosage:

For adults and children aged 12 and over: 1 -2 capsules 3 times daily after meals.

Side effects:

Widespread use of PowerCaps has demonstrated that it is well tolerated. Adverse effects reported include gastrointestinal disorders, skin rashes and tachycardia.

Contraindications:

- * Children under 12 years of age.
- * Hypersensitivity to any of the product's components.
- * Pregnancy, lactation and patients with active peptic ulceration.
